

Rochelle Cullip

My name is Rochelle Cullip. I teach 6th grade mathematics, service learning and book club. My first year of teaching was in Klawock, Alaska in 1991. The following year I moved to the Harbor Springs area and have been teaching in this district ever since. I earned my Bachelors Degree in mathematics education from Western Michigan University and I earned my Masters Degree from Eastern Michigan University in curriculum and instruction. Preparing students for success in future math classes and beyond is a priority. I believe a large part of this success means practicing the rigor and work ethic necessary for advanced math. One of my most challenging goals is striving for that balance between preparing students for the hard work while making math an enjoyable and fun experience! After school I enjoy doing many activities with my husband and our two children, such as walks in the woods, sailing, swimming, running, gardening, reading, and doing crafts together.
